

CEIG Congratulates Albanese Government, Urges Bold Energy Action

Monday 5 May 2025, Sydney: The [Clean Energy Investor Group \(CEIG\)](#) congratulates the Albanese Government on its re-election and reaffirms its commitment to working closely with the Government to progress an ambitious clean energy and climate agenda.

“Australia has the chance to seize a global leadership role in the clean energy transition – but we must act decisively,” said Marilyne Crestias, CEIG Head of Policy & Advocacy.

“With policy uncertainty clouding the investment outlook in the United States, Australia has a new opportunity to attract diverted capital and accelerate our transition to a net zero economy.

“This election has shown yet again that Australians back renewable energy, and want to see national leadership to match. It is time for the Government to deliver the bold and coordinated energy policy the nation needs. Strong climate policy will unlock billions in investment, drive regional economic development, create high-quality jobs, and ensure a smooth energy transition for all Australians.”

CEIG also welcomes Australia’s bid to host COP31.

“Hosting COP31 would send a powerful signal, but we need to walk the talk,” said Ms Crestias.

“The international community – and investors – are watching. This is our chance to demonstrate that Australia is serious about climate action.

“CEIG stands ready to support the Government in showcasing Australia’s ambition and capability.”

About the Clean Energy Investor Group

The Clean Energy Investor Group represents domestic and global renewable energy developers and investors, with more than 16GW of installed renewable energy capacity across more than 76 power stations and a combined portfolio value of around \$38 billion. CEIG members' project pipeline is estimated to be more than 46GW across Australia. It is an investor body, representing the unique perspective of clean energy investors to regulators, policy makers and the broader energy sector.
